

# GONDOMAR : GOals, Needs and Determinants Of Multimodal therapy in periAnal cRohn's Fistula

A cohort platform for CD fistula studies

# What is collected in GONDOMAR platform

## Retrospective

- Routinely collected data from fistula onset till enrolment and 6 monthly follow up data after consent : Fistula characteristics , medical surgical treatments, MRI data & images :
- Optional blood and opportunistic fistula biopsies
- Consent for contact

## Prospective

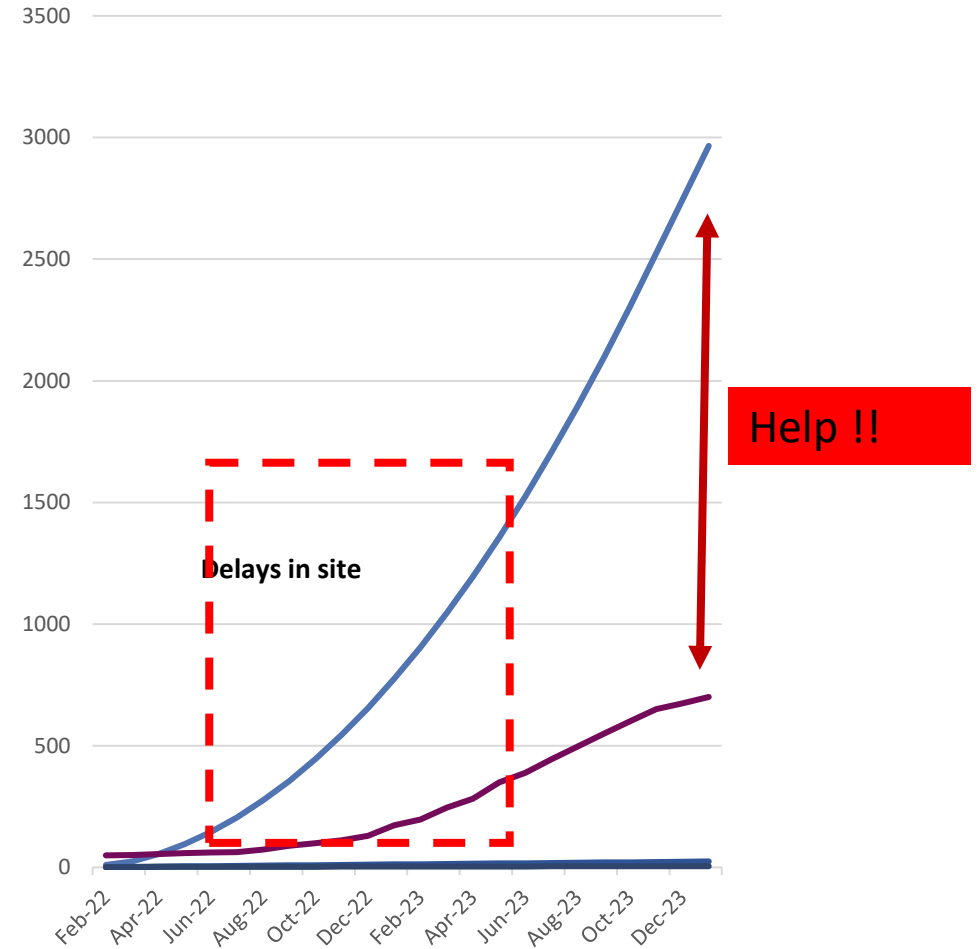

- Clinical data – Fistula characteristics , medical , surgical, treatments , MRI images
- Bio-samples - Blood, Stool , opportunistic fistula biopsies
- Routinely collected follow up data 6 monthly
- Consent for contact

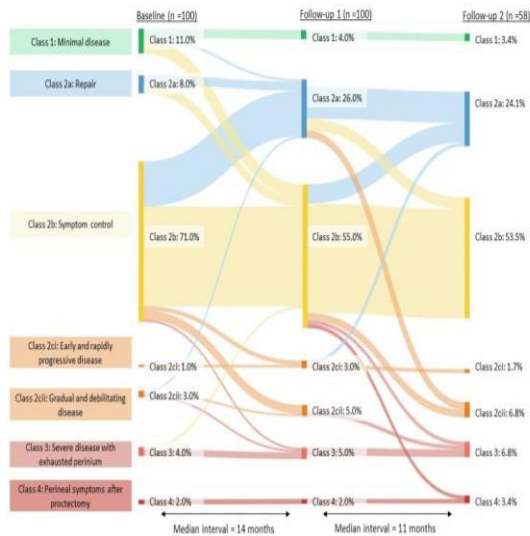

# Current status

55 Live sites  
12 in set up

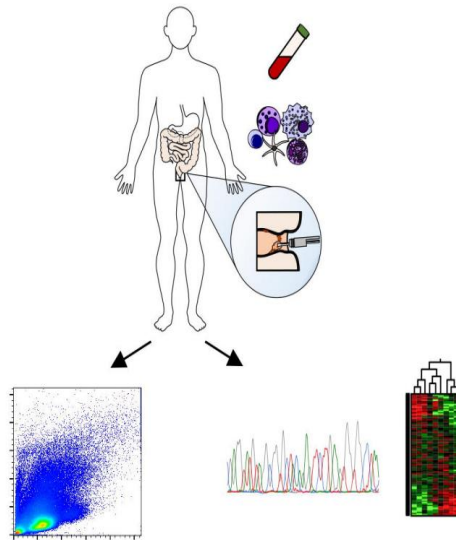

Total = 709  
Prospective - 54  
Retrospective - 655

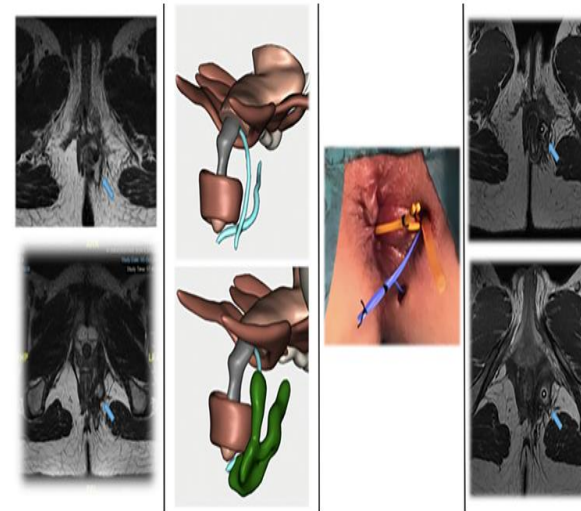

# What is possible from GONDOMAR cohort data set

**Clinical Prediction Tools**

**Translational discoveries**

**Image reconstruction**

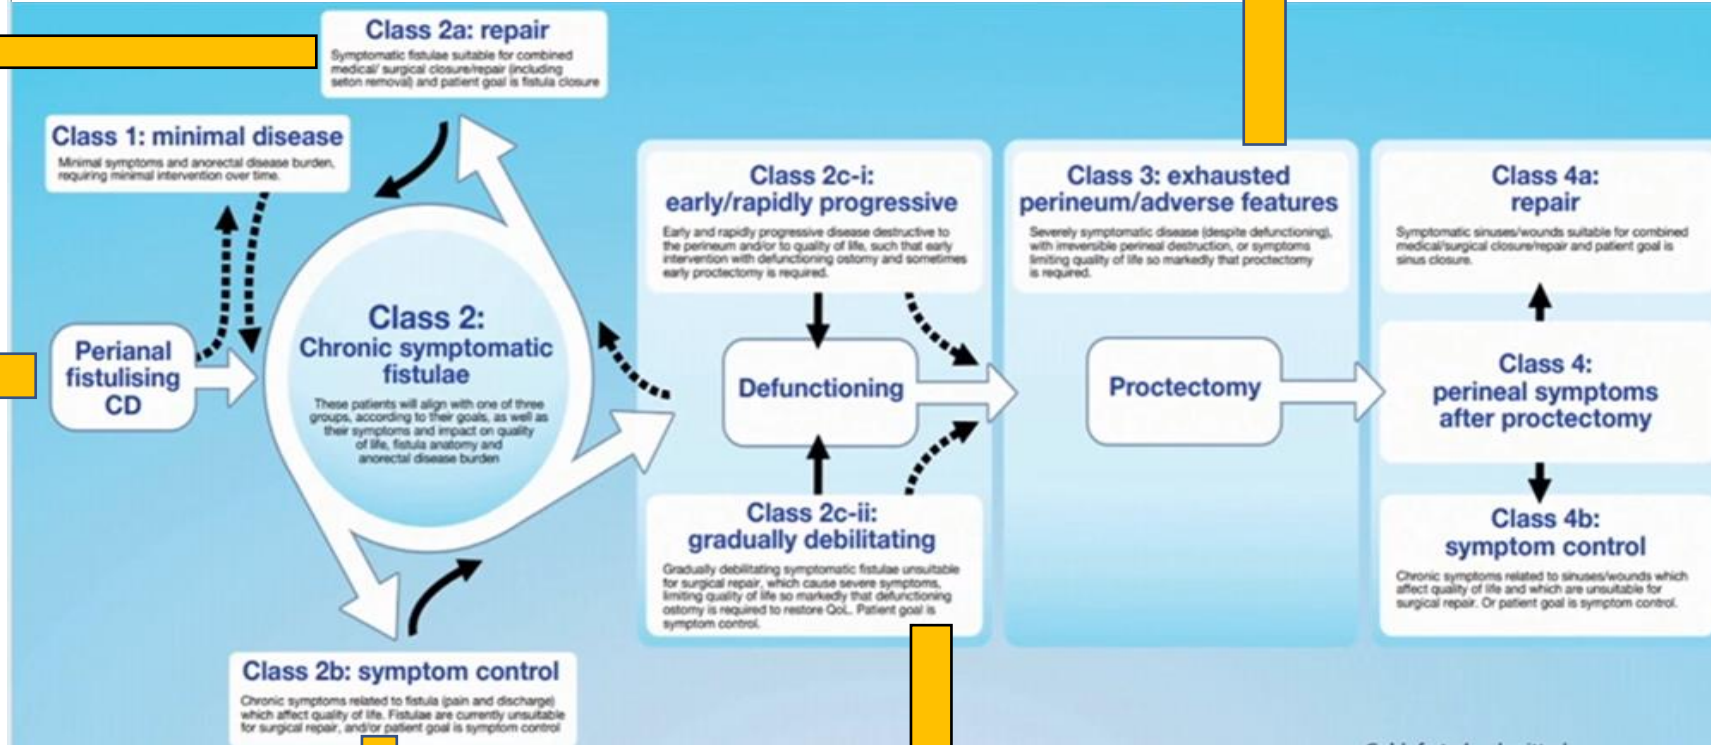

**Use of structured datasets**

# Potential Trials on GONDOMAR Platform

**REPAIR-pCD  
(HTA  
application)**

**DEFINE  
(Industry)**

**QoL post Proctectomy  
(Bowel Research UK  
application)**

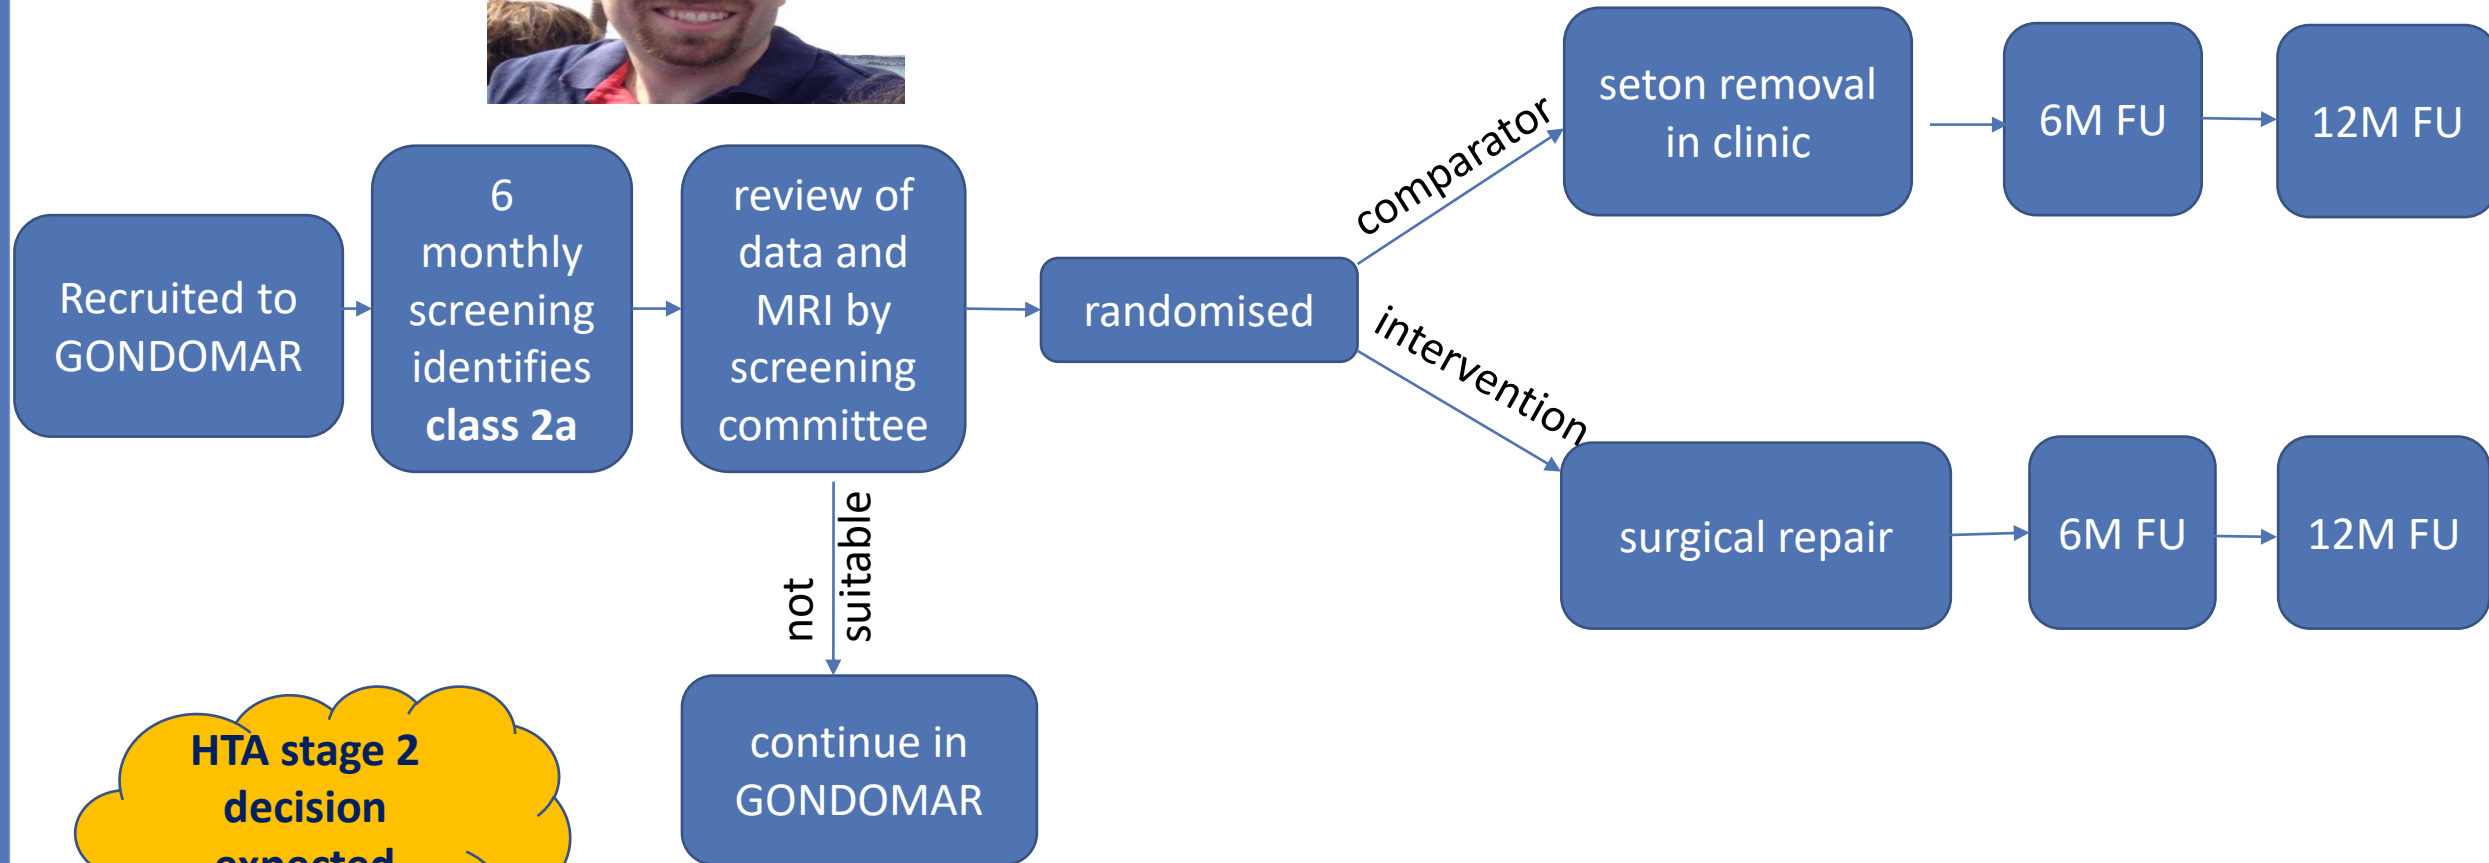

**HBOT  
open label RCT  
(HSDR  
application )**

**Small molecule versus 2<sup>nd</sup> line biologics  
(Industry - unsuccessful bid )**

**Combination biologics  
(concept stage)**

# TwICS within GONDOMAR: Repair- pCD

**HTA stage 2  
decision  
expected  
Feb2024**

# A plea to IBD investigators

- Please enrol ALL your pCD patients into GONDOMAR platform
- If we win the HTA bid, recruit 2a patients REPAIR-pCD in 2024
- DEFINE being launched Q2 2024
- Other applications in pipeline
- Regardless, we can answer many, many questions about pCD over the coming years

Thanks to funders so far..
